

DON'T LET YOUR PET'S BUSINESS BE EVERYONE'S BUSINESS.

Pet waste is full of bacteria that can make people sick. Pet waste left on your lawn washes into our storm drains polluting our creeks and rivers...the same creeks and rivers that supply our water for drinking and for recreational activities.

Please Be Responsible.

Pick up after your pet and dispose of pet waste properly. Don't just leave it on the ground. Flush it down the toilet. Seal it in a plastic bag and discard into a trashcan. Bury it in your yard.

Remember...*"Only Rain in the Drain"*
