

September 23, 2016

The Industrial Development Authority has announced that the crushed brick piled at the old Dan River Mills Schoolfield site, since the deconstruction project was completed in 2014, is now available free to contractors and the public.

There is no limit on how much can be taken; however, interested parties will need to provide their own loader. Access must be scheduled through the Public Works Office.

If interested, call the Public Works at (434) 799-5245 during regular business hours.
